INVERTER QUOTATION FOR REPLACEMENT-UNIT

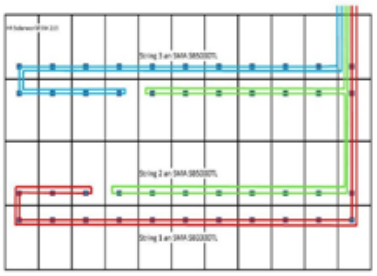

We require the following documents from you before preparing the quotation:

The datasheet for the installed solar modules.

MUSTER

The wiring diagram | string layout of the PV system

MUSTER

Is your inverter: ☐ single-phase ☐ three-phase

If you **do not have** any documentation regarding this, we will need the following:

Number of strings per inverter:

Number of solar modules per string:

Open-circuit voltage:

Short-circuit voltage:

Photos of one of your solar modules (front, back, and nameplate)

Module-Type: ☐ Mono ☐ Poly ☐ Thin-film

Based on these technical documents, we can ensure that the offered inverter is compatible with your PV system.
If these documents are not provided to us, we cannot guarantee that the inverter will function properly with the system.
